

Edge AI Deployment Playbook /  Edge AI Deployment

Hardware • Optimization • Reliability • Security

Disclaimer: This document is a practical template and does not constitute legal, compliance, or financial advice. | 

Checklist:

- Constraints: latency, power, heat, connectivity
 - Data flow: buffering, offline mode, retry, sync
 - Model optimization: quantization/ONNX/TensorRT (as needed)
 - Observability: logs, metrics, watchdog
 - Remote updates: OTA, version pinning, rollback
 - Security: device identity, key rotation, least privilege
 - Maintenance: periodic calibration, health checks
